Primary Examiner, Art Unit 1796

The following is an examiner's statement of reasons for allowance: Applicants newly submitted International Search Report has been reviewed as has been applicants IDS of 7-14-09. However, Kakeda WO '696 is the closest prior art and the best prior art has already been relied upon. Kakeda provides no examples in which a molded article is produced from a block copolymer containing an acrylic block and a methacrylic block in which in which at least one of the blocks contains a carboxyl or anhydride groups and which is reacted with an epoxy containing acrylic polymer at molding. Rather Kakeda implies any reaction (which may or may not be crosslinking) between their components takes place during kneading. While there may be some question as to whether any crosslinking inherently takes place subsequent to kneading (and there is no explicit disclosure of such in Kakeda) and during molding in Kakedas' examples, applicants specific block copolymer and acrylic polymer "B" is not used in patentees examples nor is their any other disclosure of sufficient specificity on which an inherency argument could be made that a molded article of applicants specific species is crosslinked via epoxy/ carboxyl or anhydride reaction of the components.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
